VENTILATION SYSTEM

VANFAN

It's time to clear the air...

The VanFan is a comprehensive **ventilation unit** designed to cycle air throughout the cargo area of your vehicle. It works best to clear out harmful gases, mitigate extreme heat, and remove moisture. The VanFan is designed to ensure your safety and comfort while on the road.

AIR CYCLE

10MINS

COLOUR

**BLACK/

INSTALL TIME

50MINS

KEEP YOUR CARGO SPACE AIR CLEAN

The VanFan provides a healthy ventilation solution for your commercial work van. By cycling out airborne gases, mitigating extreme heat, and removing moisture, the VanFan increases your safety while you're on the road.

Available Kit* Options

Available for all Vehicle Models

**The VanFan does NOT require an electrical hookup, instead it works in tandem with the motion of your vehicle*

VORTEX AIR CIRCULATION

Thanks to the VanFan's ease of installation, the potential for multiple units becomes not only possible, but recommended!

When installed at strategic points on the roof, the fans work in tandem to create a vortex of air circulation.

The front fan sucks air into the cargo area, while the rear pulls it out. This in turn maximizes air circulation and effectiveness

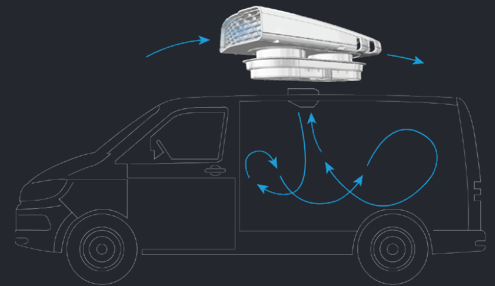

AIR CYCLES

The approximate amount of time it takes to complete a full air cycle. Results are based on cruising vehicle travel speeds.

km/h

Air Cycle Time

20	37min
40	18min
60	12min
80	10min

VANFAN FAQ

Does the VanFan need a floor drain?

No! Thanks to the innovative Push-Pull technology, all air is forced in and out via the rooftop fan unit. There is no need for a floor drain, making it an ideal option for easy installation - especially in EV's.
