

THE UPFIT YOU DESERVE

VENTILATION SYSTEM

# VANFAN ELECTRIC

It's time to clear the air...

The VanFan Electric is a comprehensive **ventilation unit** designed to cycle air throughout the cargo area of your vehicle. Being fully electric, the VanFan operates independently of your van being in motion, ensuring a constant flow of air movement - even when parked.

AIR CYCLE

**10MINS**

COLOUR

WHITE**

INSTALL TIME

**1HOUR+**

## KEEP YOUR CARGO SPACE AIR CLEAN

The VanFan provides a healthy ventilation solution for your commercial work van. By cycling out airborne gases, mitigating extreme heat, and removing moisture, the VanFan increases your safety while you're on the road.

The VanFan Electric works overtime to ensure a constant cycle of fresh air is rotating through your cargo space.

### Available Kit\* Options

Available for all Vehicle Models

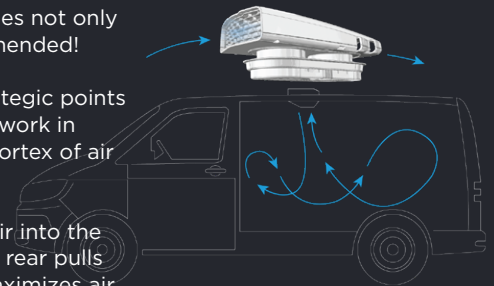

*\*The VanFan Electric version requires an electrical hookup within the vehicle. NOT battery powered.*

## VORTEX AIR CIRCULATION

Thanks to the VanFan's ease of installation, the potential for multiple units becomes not only possible, but recommended!

When installed at strategic points on the roof, the fans work in tandem to create a vortex of air circulation.

The front fan sucks air into the cargo area, while the rear pulls it out. This in turn maximizes air circulation and effectiveness

## VANFAN ELECTRIC FAQ

### Does the VanFan need a floor drain?

No! Thanks to the innovative Push-Pull technology, all air is forced in and out via the rooftop fan unit. There is no need for a floor drain, making it an ideal option for easy installation - especially in EV's.
